

PRESS RELEASE

CYBELEC AND METAMATION AGREE TO COOPERATE FOR BRINGING ON THE MARKET COMMON CNC SOLUTIONS FOR SHEET METAL AND DISTRIBUTING TOGETHER THESE SOLUTIONS WORLDWIDE

Cybelec S.A., Yverdon-les-Bains, Switzerland and Metamation Inc, Chennai, India, announced today that they have entered into an agreement to establish a long term oriented cooperation.

This agreement will expand the product offering and market reach of both companies by creating one of the largest partnerships in the sheet metal industry for providing common and comprehensive CNC solutions and distributing them worldwide. Under this agreement each company will maintain their independent corporate identity but will combine key operations in the area of this specific product range, in development, sales and services.

Through this partnership, Cybelec and Metamation will provide the sheet metal market with comprehensive solutions for controlling machines. As a result of the partnership the online press brake software RightAngle developed by Metamation, will be integrated into the Cybelec ModEva Numerical Controls. The Cybelec Metamation common CNC solutions will be completed on one hand by the wide range of Cybelec CybMotion motors and drives and on the other hand by the Metamation MetaCAM offline software.

The first common CNC solution is dedicated to bending applications and will be launched on the market at BlechExpo 2011 in Stuttgart. This new CNC is the first element of our new range of products in sheet metal applications.

ABOUT CYBELEC

CYBELEC SA, an Infranor Group Company, founded in 1970, is the largest Swiss manufacturer of numerical controls. The company is the market leader in metal forming technology and offers a complete range of high-performance numerical controls, commonly used in the press brakes and shears industry.

Testifying to CYBELEC's remarkable growth since 1970, annual production has today reached over 5'000 units and more than 70'000 machines have already been equipped.

ABOUT METAMATION

Metamation, since 1995, is a world leader in CAD/CAM software for the fabricating industry, as well as software solutions for the printing, packaging and graphic industry. With over 7000 seats of the software installed in Japan and the United States, as well as in Europe and Oceania, the MetaCAM product is well known for its class-leading performance and ease of use. The next logical step in evolving intelligence in the metal forming process is the integration of high performance software into the controls for fabricating machinery. This is done by partnering with Cybelec, the market leader in controls for metal forming.
